

IN TEAM WITH YOU

iPads, iPhones: How to manage them within the enterprise?

7 March

Dear,

Informatic Services IS s.a. has demonstrated a strong expertise in Symantec Endpoint Management Solutions: Only four companies in Belgium enjoy the status of "Symantec Endpoint Management Specialist".

Nowadays, mobile devices have massively spread within your company and your home. The biggest challenge is probably to cope with that multi-environment. and to which extent.

Symantec enables you to manage those devices very easily. It is not more complicated than handling regular endpoints (workstation, server ...).

Mobile Management Suite is an extension of Client/Server Management Suite, and guess what?

We can manage Apple (iOS 4.1 and above), Google (Android 2.2 and above), Microsoft (Windows Phone 7, Windows Mobile 6.1,6.5), RIM (Blackberry OS 4.3 and above), Nokia (Symbian v5.0.50).

Join us and discover Symantec Mobile Management Solution with IS, Symantec and Altimate. Our main topics will be capabilities, boundaries, infrastructure design consideration, roadmap & competitors overview.

We will finish with a live demo to show you it's not only theory.

 **Date:** **Wednesday 7 March**
 **Location:** **Altimate Offices**
Woluwedal 30
1932 Sint Stevens Woluwe

 **Agenda:**

10h00 - 10h30	Registration and Welcome Coffee
